Visual Art 2025

Sample teaching, learning and assessment plan

Unit 1: Art as lens

Unit description

In Unit 1, students look at their material world through the concept of ‘art as lens’, applying different lenses or viewpoints. They explore how artists work through art processes to create new ways of thinking, meaning and representation. Beginning with tangible forms as inspiration, they examine and respond to focuses of people, places and/or objects, producing figurative and non-figurative representations.
Students apply the contexts, foregrounding the personal and contemporary contexts to analyse and interpret visual communication and meaning in artworks. Students will be exposed to multiple viewpoints by examining the artist’s value systems that underpin or influence the way subject matter is perceived and represented. Students use a range of media to create a folio of experimental work in response to artist research and personal observations.

Students experiment with a range of approaches to improve technical skills, foster curiosity and creative thinking, and inspire innovative art practices. They are guided through the inquiry learning process to develop, research, reflect and resolve responses through learning experiences that facilitate investigation and experimentation.

As audience, they consider their connection to the images and objects artists use, and how artists’ viewpoints and representations challenge audience perspectives. As artists, they consider how different lenses might filter accurately or distort viewpoint, and through these lenses, they communicate how they look at and respond to the world.

Unit objectives

1. Implement ideas and representations to generate individual solutions for the depiction of the material world.
2. Apply literacy skills to communicate understanding of visual language, expression and meaning in the work of self and others.
3. Analyse and interpret art practices through the personal and contemporary contexts.
4. Evaluate influences to explore diverse figurative and non-figurative representations of the material world.
5. Justify representation of artists’ personal viewpoints.
6. Experiment in response to artists’ contemporary representations of people, place and/or objects.
7. Create visual responses using knowledge and understanding of a range of two-dimensional, three-dimensional and/or time-based media.
8. Realise responses to communicate meaning through multiple viewpoints.

Assessment plan

Assessment details	%	Objectives to be assessed	Conditions	Date
Unit 1: Experimental folio	—	1. Implement ideas and representations to generate individual solutions for the depiction of the material world. 2. Apply literacy skills to communicate understanding of visual language, expression and meaning in the work of self and others. 3. Analyse and interpret art practices through the personal and contemporary contexts. 4. Evaluate influences to explore diverse figurative and non-figurative representations of the material world. 5. Justify representation of artists’ personal viewpoints. 6. Experiment in response to artists’ contemporary representations of people, place and/or objects. 7. Create visual responses using knowledge and understanding of a range of two-dimensional, three-dimensional and/or time-based media. 8. Realise responses to communicate meaning through multiple viewpoints.	• Students must be given continuous class time to develop Making 1. • Selection of 4–8 developmental artworks. Selected artworks do not require resolution. They should be selected based on demonstration of engagement in inquiry learning processes, divergent thinking and experimentation with ideas, representation and media. • Reflection — evaluation of the influences and viewpoints expressed in their own art making and developing art practice. • Teacher-directed media area(s).	During the first three-quarters of the unit

Assessment details	%	Objectives to be assessed	Conditions	Date
Unit 1: Reverse chronology investigation	—	1. Implement ideas and representations through an inquiry to investigate solutions for the depiction of the material world. 2. Apply literacy skills to communicate understanding of visual language, expression and meaning in the work of self and others. 3. Analyse and interpret art practices through the personal and contemporary contexts. 4. Evaluate influences to explore diverse figurative and non-figurative representations of the material world. 5. Justify representation of artists' personal viewpoints. 6. Experiment in response to artists' contemporary representations of people, place and/or objects. 8. Realise responses to communicate meaning through multiple viewpoints.	• Student choice of one of the following – Written: up to 2000 words – Multimodal (at least two modes delivered at the same time): up to 10 minutes (up to 2000 words or up to 12 presentation slides) – Digital presentation (e.g. video, digital book): up to 12 presentation slides (up to 2000 words or up to 10 minutes) • Visual support, including relevant annotated artworks, images, diagrams and/or experimental representations.	During the last quarter of the unit

Teaching and learning plan

Time	Subject matter	Learning experiences	Resources
3 hours	**Developing** How do artists generate solutions to visual problems? Students: • develop new and expressive forms of representation as they generate solutions to visual problems • implement ideas for visual responses that explore – direct observation to visually represent people, places and/or objects through techniques such as drawing, photography, collecting, painting, collage, printmaking, video and animation – the viewpoint of the artist in representations of people, places and/or objects. For an example of this concept, watch *The Lab: Decoy — A portrait session with a twist* (Chris Ireland, 2015) – ways of looking at and representing people, places and/or objects to extend subject matter from realism to innovative abstraction using a range of processes, such as deconstruction, distortion, stylisation and reduction ▪ suggested artists/artworks: Jennifer Mills, *What's in a Name,* 2009–11; Therese Ritchie, *You Know Me* (series), 2012; Laith McGregor, *Balloon Beard*, 2008; Del Kathryn Barton, *You are what is most beautiful about me, a self portrait with Kell and Arella,* 2008; Janet Laurence, *The Green That Was* (*Crimes Against the Landscape* series), 2008; Louise Forthun, *Light Fantastic*, 2011; develop an awareness of appropriate health and safety practices for art materials, techniques, technologies and processes in respect to both themselves and the environment. **Reflecting** How do artists consider ideas and information, media techniques and processes?	**Introduction** • Responding: – students ▪ watch the film *The Lab: Decoy — A portrait session with a twist* as a demonstration of artist lens ▪ participate in a teacher-led discussion of how prior knowledge, internal and external influences impact how an artist represents an idea. **Stimulus collaborative drawing activities** Use different lenses to observe and represent everyday objects using figurative and non-figurative techniques. • Making: – students work ▪ on a grapevine — only one student can see the object, while subsequent students copy and draw from the previous students' drawings ▪ back-to-back — one student describes the subject while the other student draws it ▪ using viewfinder to isolate sections of subject to magnify and abstract ▪ on a still-life drawing on large sheets or rolls of paper, with all students moving along, adjusting, manipulating and adding to different sections in a time-controlled sequence ▪ blindfolded to draw objects, focus on looking and loss of sense. • Discussion: Is there a right and wrong way to represent something in art? – look for examples of representations of a common subject in artworks of various times and places, such as fruit, dogs, skulls – consider how the artists' expression changes meaning, such as Deb Mostert, *Crayfish*, 2022; Sarah Rayner, *Flower Bones,* 2018. – use visual art terminology when talking and writing about artworks.	Supporting resource: Contexts Supporting resource: Media areas • Supply range of complex, everyday objects as stimulus to develop observational and technical skills e.g. kitchen implements, decorator household objects, dolls, toys, large seed pods • range of drawing materials and surfaces • respond to resources such as – Clover, F. and Erickson, M. (2003). 'Viewpoints for art understanding', *Translations: The National Art Education Association*, 12(1), Spring 2003. – President and Fellows of Harvard College & Project Zero 2021, Lenses for dialogue, in Tishman, S., James, C., Chua, F., Perkins, D., Piper-Vallillo, E. and Beil, A. (eds.) *Arts as civic commons: Amplifying the power of art to spark civic inquiry*, pp.28-31. • *The Lab: Decoy — A portrait session with a twist*, vimeo.com/144816506 • Jennifer Mills, *What's in a Name,* 2009–11 https://learning.qagoma.qld.gov.au/artworks/whats-in-a-name • Therese Ritchie, *You Know Me* (series), 2012 https://collection.qagoma.qld.gov.au/creators/ritchie-therese • Laith McGregor, *Balloon Beard*, 2008 https://www.irismagazine.com/issue-one/laith-mcgregor • Del Kathryn Barton, *You are what is most beautiful about me, a self portrait with Kell and Arella,* 2008 https://www.artgallery.nsw.gov.au/prizes/archibald/2008/28606 • Janet Laurence, *The Green That Was* (*Crimes Against the Landscape* series), 2008 https://www.mca.com.au/stories-and-ideas/after-nature-janet-laurence • Louise Forthun, *Light Fantastic*, 2011 https://louiseforthun.com/exhibitions/2011-2/into-the-light-2011 • Deb Mostert, *Crayfish*, 2022 https://debmostertartist.com.au • Sarah Rayner, *Flower Bones,* 2018 https://www.sarahrayner.com.au

Time	Subject matter	Learning experiences	Resources
	• Students reflect on the impact of different lenses that filter and distort representations in artworks as they consider ideas and information, media, techniques and processes. **Key terminology** How do artists and audiences write and talk about art? Students: • apply visual art terminology when writing about and talking about artworks of self and others as they become familiar with the following key terms – deconstruction — the dissection of imagery or forms physically or metaphorically to make or change meaning – distortion — the intentional alteration or exaggeration of reality, forms, or proportions in artistic representation – expression — the creation of visual symbol systems through the making of marks or objects that communicate ideas – figurative — images or objects clearly derived from real object sources, representational and recognisable in origin – innovative — new and original for the context of learning; introducing new ideas through the combination of research and reflection; original and creative in thinking – non-figurative — not derived from reality or representing recognisable objects or forms – stylisation — the process of simplifying, exaggerating, or altering the visual elements of a subject or object in order to emphasise certain characteristics – representations — visual depictions of somebody or something – viewpoint — an answer to a question; the perspective, lens or context presented as an interpretation of meaning and intention in artworks.		
6 hours	**Developing** Students: • implement investigation of diverse art practices through teacher-facilitated inquiry questions • create visual responses to communicate personal and contemporary ideas and become familiar with visual language, art materials, techniques, technologies and processes in a range of – two-dimensional artworks that might employ line, tone, colour, shape and texture; composition, balance, repetition, contrast, harmony, emphasis and unity. **Researching** How do artists react to stimulus? Students: • research visual communication of diverse art-making lenses or viewpoints as they react to stimulus	• Introduction to inquiry learning processes, contemporary context and personal context through inquiry questions and concept of 'Art as lens': – researching: How do artists react to stimulus? – developing: How do artists generate solutions to visual problems? – reflecting: How do artists consider ideas and information, media techniques and processes? – resolving: How do artists communicate individual ideas as visual, written or spoken responses? – Key terminology: How do artists and audiences write and talk about art? • Responding: – students	• Art guide Australia — a guide to hundreds of current contemporary art exhibitions. Search by city, state, artist or gallery https://artguide.com.au • Art21 — documentary films and resources featuring contemporary artists. Search by themes, mediums and narratives https://art21.org • range of complex, everyday objects suitable to develop observational and technical skills • range of drawing materials and surfaces • explore artworks through the personal context, such as – Vernon Ah Kee, Not an animal or a plant, 2017 https://www.sbs.com.au/nitv/article/not-an-animal-or-a-plant-putting-a-human-face-to-1967-referendum/lp7my9wtg – Ricky Swallow, *Killing Time*, 2003–2004 https://www.artgallery.nsw.gov.au/collection/works/125.2004/#about • explore artworks through the contemporary context, such as – Cai Guo-Qiang, *Falling Back to Earth*, 2013 https://www.qagoma.qld.gov.au/learn/education-resources/cai-guo-qiang – Barbara Kruger, *Untitled (Skate)*, 2017 https://art21.org/watch/extended-play/barbara-kruger-part-of-the-discourse-short

Time	Subject matter	Learning experiences	Resources
	• analyse and compare past and present artworks through the contemporary context to interpret 21st century art ideas and issues, and how these challenge engagement, communication and meaning; through – responding, students examine new or different meaning and significance that may be assigned to artworks of the past; and question and re-evaluate traditionally held values and assumptions of art and representation • analyse and compare artworks through the personal context to interpret emotions, sensory experiences, personal philosophy, beliefs and ideas, and how these contribute to engagement, communication and meaning through – responding, students examine how artists are influenced by life and experiences, and consider how their own feelings and background influence their physical and emotional reactions as audience • experiment with a range of lenses in visual responses that represent the material world, such as – figurative and non-figurative devices inspired by art practices of various artists ▪ suggested artists/artworks: John Mawurndjul, *Milmilngkan*, 2007; David Noonan, *Untitled* (figurative screen-prints), 2008; Amanda Marburg, *Professor*, 2005, Dan Elborne, *Five Hundred*, 2016. **Reflecting** Students: • evaluate visual language, processes and intentions in artworks that purposely distort representations to emphasise and communicate the artists' viewpoint – suggested artists/artworks: Kohei Nawa, *PixCell-Elk#2,* 2009, *PixCell-Double Deer#4*, 2010; Ken + Julia Yonetani, *The Last Supper*, 2014; Justine Khamara, *Watch me slip through these thin sheets*, 2012; Judith Wright, *A Wake*, 2011. **Key Terminology** How do artists and audiences write and talk about art? Students: • apply visual art terminology when writing about and talking about artworks of self and others as they become familiar with the following key terms – approaches — defined processes or theories for making art and/or responding to artworks – art practices — relates to the techniques, skills and procedures that students and artists develop to create their artwork; and to work in the arts industry – concept — unit organisers that direct student learning and integrate making and responding; unit concepts engage students in learning experiences that allow them to develop their own focuses for artworks with an understanding of related artworks from a range of contexts	▪ are engaged with a comparison of two contemporary artists as case studies, with inquiry questions used to discuss artwork and artist practice ▪ prepare written-paragraph responses to articulate personal and contemporary analysis and interpretation of artworks. • Contemporary context guiding questions: – How is the meaning and significance of past artworks challenged when viewed through a lens of 21st century ideas and issues? – How do contemporary art approaches, technologies or environments impact the viewer experience and interpretation of artworks? – How are artistic or social traditions challenged and expanded by contemporary art forms, subject matter and display? • Personal context guiding questions: – How does an artist's practice reflect the influences of their life and experiences? – How do the experiences and expectations of the viewer influence the reading of the artwork and the construction of personal meaning? – How does an artist use symbols, metaphors and expression to communicate personal stories, thoughts, feelings, philosophies and ideas? • Making activities in response to artist case studies: – metamorphosis of an everyday object into a living form to communicate a local environmental message – recontextualisation of a photograph of a family member or self through pattern, repetition, text, displacement — rephotograph and digitally manipulate, print and collage to communicate a personal viewpoint.	• suggested artists/artworks: – John Mawurndjul, Milmilngkan, 2007 https://www.tate.org.uk/art/artists/john-mawurndjul-29630/five-things – David Noonan, Untitled (figurative screen-prints), 2008 https://www.artgallery.nsw.gov.au/collection/works/429.2009 – Amanda Marburg, *Professor*, 2005 – Dan Elborne, *Five Hundred*, 2016 https://danelborne.studio/fivehundred – Kohei Nawa, PixCell-Double Deer#4 2010 https://learning.qagoma.qld.gov.au/artworks/pixcell-double-deer4 – Ken + Julia Yonetani, The Last Supper, 2014 https://kenandjuliayonetani.com/en/works/thelastsupper – Judith Wright, A Wake, 2011 https://www.judith-wright.com/portfolio-post/a-wake – Kohei Nawa, PixCell-Double Deer#4 2010 https://learning.qagoma.qld.gov.au/artworks/pixcell-double-deer4 – Ken + Julia Yonetani, The Last Supper, 2014 https://kenandjuliayonetani.com/en/works/thelastsupper – Justine Khamara, *Watch me slip through these thin sheets*, 2012 – Judith Wright, A Wake, 2011 https://www.judith-wright.com/portfolio-post/a-wake

Time	Subject matter	Learning experiences	Resources
	– contexts — frames of reference that inform the concepts and focuses, allowing intended and suggested meaning to evolve; in Unit 1 these contexts include contemporary and personal perspectives – experiment — try out or test new ideas or methods, especially in order to discover or prove something; undertake or perform a process to make a discovery or demonstrate a known fact – inquiry learning — emphasises the process of investigation as well as the production of an image or object; it moves away from the acquisition of facts to the development, research, reflection and resolution of ideas and new knowledge; also art processes – making — working in the art form as artist using knowledge, skills, materials, techniques, technologies and processes to communicate ideas and intentions – meaning — what an artist expresses in an artwork; or what a viewer understands and interprets from an artwork – media — overviews of knowledge, skills, techniques and processes; each area should not be viewed as distinct or limited to preconceived understandings of the visual art discipline; media areas are not separate and multi/cross-media presentations should be encouraged – two-dimensional — is used to describe works of art such as paintings and drawings that exist on a flat surface – visual language — constructed using art elements that are organised through design principles; together these create meaning that can be decoded and interpreted by an audience.		
3 hours	**Developing** Students: • develop new and expressive forms of representation as they generate solutions to visual problems • implement ideas for visual responses that explore – direct observation to visually represent people, places and/or objects through techniques such as drawing, photography, collecting, painting, collage, printmaking, video and animation – the viewpoint of the artist in representations of people, places and/or objects – ways of looking at and representing people, places and objects to extend subject matter from realism to innovative abstraction using a range of processes, such as deconstruction, distortion, stylisation and reduction • create visual responses to communicate personal and contemporary ideas and become familiar with visual language, art materials, techniques, technologies and processes in a range of	**Formative assessment: Experimental folio** Students • select a personal place or object to use as stimulus for their experimental folio • view and consider other student visual responses and artist statements in online exhibitions as inspiration. Select artworks to discuss – range of media and approaches – visual language – personal and contemporary context – application of literacy skills in artist statements.	Suitable places for student choice: • have a personal connection • local and can be easily accessed • have interesting or complex physical and sensory elements • include complex forms, shapes or structures. Suitable objects for student choice: • have a personal connection • can be left at school • are not precious (may get deconstructed) • have interesting or complex physical and sensory elements • are complex in form, shape or structure. Student artwork online exhibitions, such as • Queensland's Creative Generation Excellence Awards in Visual Art https://creativegeneration.education.qld.gov.au/visual-art/central-exhibition • Top Arts Victorian Season of Excellence https://www.ngv.vic.gov.au/learn/top-arts-hub • ARTEXPRESS New South Wales https://artexpress.artsunit.nsw.edu.au • Brisbane Portrait Prize Next Gen Exhibition https://brisbaneportraitprize.org/next-gen-hc-exhibition

Time	Subject matter	Learning experiences	Resources
	– two-dimensional artworks that might employ line, tone, colour, shape and texture; composition, balance, repetition, contrast, harmony, emphasis and unity – time-based artworks that might employ time, movement, sound, silence, rhythm, lighting, colour, sequence, pace, movement, focus and tone – three-dimensional artworks that might employ colour, texture, form, surface, scale, mass, movement, volume, unity, symmetry and repetition • develop an awareness of appropriate health and safety practices for art materials, techniques, technologies and processes in respect to both themselves and the environment. **Researching** Students: • research visual communication of diverse art-making lenses or viewpoints as they react to stimulus • analyse and compare past and present artworks through the contemporary context to interpret 21st century art ideas and issues, and how these challenge engagement, communication and meaning; through – making, students can test boundaries of traditional art practices; they reconceptualise, modify and explore appropriation of artworks and images; and investigate the impact and place of new technologies on art practices and experiences – responding, students examine new or different meaning and significance that may be assigned to artworks of the past; and question and re-evaluate traditionally held values and assumptions of art and representation • analyse and compare artworks through the personal context to interpret emotions, sensory experiences, personal philosophy, beliefs and ideas, and how these contribute to engagement, communication and meaning through – making, students investigate their responses to the world around them, their personal interests, experiences and philosophies, and the impact these have on symbolism and practices – responding, students examine new or different meaning and significance that may be assigned to artworks of the past; and question and re-evaluate traditionally held values and assumptions of art and representation • analyse and interpret artworks in teacher-directed, reverse chronology case studies to investigate and compare historical influences on contemporary artists and approaches • experiment with a range of lenses in visual responses that represent the material world, such as – figurative and non-figurative devices inspired by art practices of various artists		• Young Archie Competition (Archibald Prize AGNSW) https://www.artgallery.nsw.gov.au/art/prizes/young-archie
		Lens: Objective vs subjective Context: Personal — reaction to and experience of place • Responding: – students ▪ examine the place or object through an objective lens, using all senses, and document in written, visual and spoken forms (based on factual, quantifiable and measurable descriptions) ▪ gather opinions and perspectives of others in reaction to the place or object using interview and small-group discussion — categorise comments as objective or subjective (based on personal feelings, emotions, aesthetics) ▪ research and document objective information, e.g. maps, history of use; and subjective information e.g. anecdotes, personal stories, references in literature, song ▪ share experiences with class/small groups through presentation/discussion, include selected objective and subjective reactions. • Making: – students ▪ photograph place or object to communicate (i) objective lens and (ii) subjective lens; consider techniques and use of backgrounds, lighting conditions, locations, interactions with figures, places, other objects ▪ digitally manipulate selected photographs to enhance objective or subjective meaning, e.g. addition of text, layering with other imagery.	
3 hours		**Lens: The psychology of seeing as an artist** • Responding: – students ▪ make lists to describe impressions and reactions to artworks that use representational techniques and artworks that are experiential ▪ identify techniques and conventions that artists use to communicate visually ▪ conduct a case study — Sandra Selig, *Heart of the air you can hear*, 2011; Michael Zavros, *Falling* (series), 2006; Gabriella Mangano; Silvana Mangano; Clark Beaumont working practice. • Making: – students ▪ draw using techniques that convert the subject into lines, shapes and colours instead of the object as concept, e.g. blind contour; isolated sections using viewfinders; cut photographs of the object into a grid; turn photographs of the object upside-down ▪ explore spatial devices used to communicate depth and distance and 'twist' them to manipulate and challenge the communication of real space, e.g. overlapping, relative size, foreshortening, aerial perspective, vertical position, linear perspective; draw or paint the negative space surrounding the object or structures in the place; cut the image and use the pieces to reconstruct using	• respond to resources such as – Dingfelder, S. (2010). 'How artists see', Monitor on Psychology, 41(2), American Psychological Association. www.apa.org/monitor/2010/02/artists.aspx – Edwards, B. (1979). Drawing on the Right Side of the Brain. New York: Penguin Putnam. • conduct a case study – Sandra Selig, *Heart of the air you can hear*, 2011 https://www.ngv.vic.gov.au/explore/collection/work/148215 – Michael Zavros, *Falling* (series), 2006; https://www.michaelzavros.com/artwork/falling-september – Gabriella Mangano; Silvana Mangano; Clark Beaumont working practice.

Time	Subject matter	Learning experiences	Resources
	– multiple representations of the same source ▪ suggested artists/artworks: Gosia Wlodarczak, *DUST COVER CHAIR*, 2013; Robert MacPherson, *1000 FROG POEMS: 1000 BOSS DROVERS*, 1996–2014	abstraction techniques such as repetition, reflection, removal, rearranging ▪ explore movement and endurance in a performance that responds to a sensory experience; create a video of the performance.	
3 hours	– exploitation of relevant art conventions, elements and principles to enhance viewpoint ▪ suggested artists/artworks: Jennifer Herd, *In Defence – Shields of the North*, 2015 – manipulation of meaning and artist's intention by exploiting, emphasising or distorting degrees of representation, visual language and expression to convey ideas ▪ suggested artists/artworks: Jess MacNeil, *The Swimmers*, 2009; Daniel Crooks, *Static No. 12*, 2009. **Reflecting** Students: • reflect on the impact of different lenses that filter and distort representations in artworks as they consider ideas and information, media, techniques and processes • evaluate – how artists assign and represent symbolic value on various people, places and/or objects through traditional and non-traditional approaches in artworks ▪ suggested artists/artworks: Marian Drew, *Still Life/Australiana* series, 2003–2009; Euan Macleod, *Gallipoli* series, 2015; Hong Chun Zhang, *My Life Strands*, 2009; Deborah Kelly, *The Miracles*, 2012 – visual language, processes and intentions in artworks that purposely distort representations to emphasise and communicate the artists' viewpoint • justify – individual art practice by documenting process to make meaningful connections and inform progress – how artists apply lenses to represent and communicate personal values and viewpoints in artworks • participate in an authentic experience as artist or audience to reflect on diverse art practices, traditions, cultures and theories. Experiences that can be offered include – excursions, such as gallery visits – incursions, inviting guests such as artists-in-residence or collaborating with artists.	**Lens: Beauty and aesthetics** • Responding: – students ▪ undertake a think–pair–share activity addressing the questions: Must art be beautiful or skilful to be good/effective/successful? How are ideas of beauty manipulated by artists? ▪ discuss and compare artworks that demonstrate traditional ideas of beauty and aesthetics with artworks that challenge through grotesque forms, provocative materials, disturbing subject matter and/or naïve approaches (implied or purposeful absence of skill) ▪ case study — Jana Sterbak, *Vanitas: Flesh Dress for an Albino Anorectic*. • Making: – students ▪ photograph or draw place or object using techniques to communicate beauty, value, majesty, e.g. lighting, soft focus, hyperrealism, colour intensity ▪ create a two-dimensional work that challenges the previous representation of the place or object through the 'removal' of beauty or skill, e.g. harsh mark-making, destruction of surface, application of impermanent/non-traditional media.	• respond to resources such as – Jana Sterbak, Vanitas: Flesh Dress for an Albino Anorectic Meat-dress sculptor wins Governor General's art award', *CBC News*, 28 February 2012. https://www.cbc.ca/news/entertainment/meat-dress-sculptor-wins-governor-general-s-art-award-1.1255728 – Gosia Wlodarczak, DUST COVER CHAIR, 2013 https://www.saatchiart.com/en-au/art/Drawing-Dust-Cover-Chair/67/1190212/view?srsltid=AfmBOoovl3H5RK3JoNsjLqR1SliwW3pg6YU3z4Se_kFa0js1LHnofmE_ – Robert MacPherson, 1000 FROG POEMS: 1000 BOSS DROVERS, 1996–2014 https://learning.qagoma.qld.gov.au/artworks/1000-frog-poems-1000-boss-drovers-yellow-leaf-falling-h-s – Jennifer Herd, In Defence – Shields of the North, 2015 https://www.fireworksgallery.com.au/artist/jennifer-herd – Jess MacNeil, The Swimmers, 2009 https://jessmacneil.com/home/art/2009/the-swimmers – Daniel Crooks, Static No. 12, 2009 https://www.youtube.com/watch?v=Z6M1NV8Mch8; https://vimeo.com/77654682.
3 hours		**Lens: Illusions of reality** Artist-in-residence — Joachim Froese • Responding: – students ▪ undertake a three-level guide comprehension activity to prepare for artist-in-residence ▪ view and discuss a range of artworks from the artist's body of work; use contemporary and personal context to analyse and interpret the artworks; consider how display is used to add meaning, particularly in large, multi-panelled works, such as *A Walking Shadow* series ▪ engage in artist's talk and demonstrations of practice ▪ prepare a reflective statement on working with artists as inspiration, including analysis and interpretation of two Joachim Froese artworks. • Making: – students ▪ photograph objects and manipulate images inspired by the artist's practice to create illusions of reality, such as gravity, multiplicity; and communicate symbolic meaning ▪ explore techniques and skills such as constructed image, multiple frames, lighting, tripods, post-production manipulation using Photoshop, macro lens, sectioning, cropping, surface, texture and colour.	• respond to resources such as – *Joachim Froese*, www.joachimfroese.com – Craig, G. (2010). 'A history: Joachim Froese', *Art Monthly Australia*, no. 227, March 2010. www.joachimfroese.com/uploads/4/9/6/0/49603091/art_monthly.pdf – Marian Drew, Still Life/Australiana series, 2003–2011 https://www.mariandrew.com.au/australiana – Euan Macleod, Gallipoli series, 2015 https://www.euanmacleod.com/copy-of-group-exhibitions – Hong Chun Zhang, My Life Strands, 2009 https://artscanvas.org/arts-culture/what-long-black-hair-represents-to-this-artist – Deborah Kelly, The Miracles, 2012 https://www.artlink.com.au/articles/4000/deborah-kelly-the-miracles
6 hours	**Resolving** How do artists communicate individual ideas as visual, written or spoken responses? Students: • resolve ideas as they respond in visual, written or spoken forms	**Lens: Self** • Responding:	• conduct a case study – Tromarama, https://www.youtube.com/watch?v=DD5SHhpC2hQ

Time	Subject matter	Learning experiences	Resources
	• apply – literacy knowledge and skills to understand form and structure of extended paragraphs and written or spoken report responses – language conventions to construct written responses about meaning and expression in artworks and inspirational art practices that meet specified conditions – referencing conventions to acknowledge sourced information about relevant artists and their practices when researching – critical literacies across visual, aural, kinaesthetic, spatial and multimodal devices to assist learning when interpreting and making meaning • realise – ideas in making and responding tasks through the personal and contemporary contexts to communicate innovative representations of the material world – information and ideas to communicate multiple perspectives by combining and layering various art materials, techniques, technologies and processes – by considering how specific display possibilities of artworks can enhance the communication of art meaning and establish new ways of looking at the material world.	– students ▪ analyse and compare communication and expression in moving image artworks by considering the impact of elements such as speed, lighting, sound, text, anthropomorphism ▪ view and discuss the working processes and the lens of artists using stop-motion animation to express ideas and communicate ▪ conduct case study — Tromarama, *Everyone is Everybody*, 2012; *Ting*, 2008. • Making: – students ▪ create an animation to communicate personal significance of a place or object; consider the use of visual clues, such as patterns, images, words; associations with other objects, people or places; techniques such as drawing, erasing, morphing, zooming, focus; colour manipulation, audio, the hand of the artist.	– Tromarama, *Everyone is Everybody*, 2012; https://www.youtube.com/watch?v=A9Qj77jiUTQ – Tromarama *Ting*, 2008 https://vimeo.com/151873594
6 hours	**Key Terminology** How do artists and audiences write and talk about art? Students: • apply visual art terminology when writing about and talking about artworks of self and others as they become familiar with the following key terms – appropriation — the incorporation of a borrowed idea or image that is reconceptualised to give new meaning – art conventions — established procedures used by artists to represent or organise ideas, convey meaning and create aesthetic value – authentic experience — engagement with actual and original art forms through participation in a live experience; for example, a site visit to a museum or gallery; working with an artist as mentor, collaborator, or artist in residence – critical literacies — refers to the skills required for engaging with linguistic and non-linguistic texts, and using multimedia and technological tools to make meaning, learn about the world and engage with others; these literacies refer to aural, digital, kinaesthetic, oral, visual and written – exploit — use inherent qualities of media to its full potential to assist communication of meaning	**Lens: Is this art?** • Responding: – students observe how ready-made artworks are displayed in galleries – students discuss questions ▪ How do artists meet the challenges of the ready-made? ▪ How does the hand of the artist ascribe objects with a sense of significance? ▪ How have contemporary artists made use of new materials as an extension of earlier ready-made ideas? ▪ Do ready-made artworks lose function or gain new purpose? ▪ How does manipulation or addition of other materials to ready-made objects add meaning? – students ▪ evaluate student exhibition in a brief written review ▪ consider how artists assign and represent symbolic value on various objects through non-traditional approaches in artworks ▪ consider visual language, processes and intentions ▪ consider role of the art critic; exhibition review structure and content; supporting viewpoints with evidence ▪ conduct a case study — Martin Creed, e.g. *Work No. 189*, 1998; Lin Onus e.g. *A stronger spring for David: toas for a modern age*, 1994. • Making: – students ▪ present an exhibition of ready-made artworks ▪ display selected objects as artworks; students may choose to manipulate or add other materials to add meaning and message to their object	• respond to resources such as – Clear Island (2013). *Tell me whom you haunt: Marcel Duchamp and the contemporary readymade.* *https://www.youtube.com/watch?v=aEVOoCcF_YY* – *Martin Creed What's The Point Of It Hayward Gallery* (2014) https://www.youtube.com/watch?v=BH_YDixizCA – Martin Creed, Work No. 189, 1998 https://collection.qagoma.qld.gov.au/stories/625 – Lin Onus, *A stronger spring for David: toas for a modern age*, 1994 https://learning.qagoma.qld.gov.au/artworks/a-stronger-spring-for-david-toas-for-a-modern-age/ – Bailey, M. (2016). 'Is this the very first readymade? Three million years before Duchamp, an ape-like humanoid in Africa found a stone that is now going on display for the first time at the British Museum', *The Art Newspaper,* 26 September. www.nexusnewsfeed.com/article/is-this-the-very-first-readymade – Khan Academy & Smarthistory (2012). *Andy Warhol's Soup Cans: Why Is This Art?* [online conversation between Sal Khan and Steven Zucker about Andy Warhol's *Campbell's Soup Cans,* 1962 https://www.khanacademy.org/humanities/art-1010/xdc974a79:pop-art/xdc974a79:american-and-european-pop-art/v/andy-warhol-campbell-s-soup-cans-why-is-this-art • Supporting resource: artist's statement

Time	Subject matter	Learning experiences	Resources
	– folio — a collection of experimental and resolved making outcomes that may demonstrate a range of explorations and ideas – modify — change the form or qualities of; make partial or minor changes to something – reconceptualise — where an image, object or idea is considered or interpreted through a new concept or theory – reverse chronology — follows a cause-and-effect pathway to understanding influences on artists, styles and approaches – three-dimensional — art forms, such as sculpture, that have depth – time-based media — artworks that use time as a dimension; measured in duration, e.g. film, video, animation, sound, computer-based technologies and some performance works.	▪ write an artist's statement that invites the audience to see the object as a symbol or metaphor.	
3 hours		**Lens: Perception and presence** • Responding: – students ▪ explore ephemeral representations and distorted forms using shadows and light to alter audience perception ▪ undertake case study — Judy Watson, *Burnt vessels*, 2009. • Making: – students ▪ use sunlight or directional lights to cast shadows of the subject and distort the subject's form; trace or photograph the shadows; work into shapes with mixed media to distort and enhance features and details ▪ capture movement of cast shadows in moving image; use sound and video effects to manipulate perception and understanding of object.	• *Art21* — search William Kentridge videos https://art21.org/artist/william-kentridge • Judith Wright, *Desire*, 2009; *A Wake*, 2011 https://collection.qagoma.qld.gov.au/objects/17522 • conduct a case study – Judy Watson https://collection.qagoma.qld.gov.au/creators/watson-judy • Sean Cordeiro and Claire Healy *We hunt mammoth*, 2015 https://claireandsean.com/large-scale-projects/we-hunt-mammoth
3 hours		**Lens: Force the viewer to see things differently** • Responding: – students ▪ compare artworks that draw attention to individual parts of the whole – students discuss questions ▪ What processes do artists work through to separate forms? ▪ How does the treatment of the whole change the viewer's understanding? ▪ What messages and meanings are explored through the deconstruction of everyday forms? – students ▪ explore the art practices of collaborative artists ▪ conduct case study — Sean Cordeiro and Claire Healy *We hunt mammoth*, 2015; Alfredo and Isabel Aquilizan, *Project be-longing: in transit*, 2006. • Making: – students ▪ deconstruct place or objects (as much as possible) to isolate or separate individual components; photograph, trace, draw components; label components to assign new meaning, ▪ convert three-dimensional objects into individual two-dimensional components and shapes; use two-dimensional shapes to explore flattened perspective using screen-printing and collage techniques; consider abstraction of the still-life form, colour theory, negative space, arrangement, composition, low relief.	• Alfredo and Isabel Aquilizan, *Project be-longing: in transit*, 2006 https://www.artlink.com.au/articles/2983/project-belonging-alfredo-26-isabel-aquilizan
15 hours	**Developing** Students: • develop new and expressive forms of representation as they generate solutions to visual problems	**Formative assessment: Reverse chronology investigation** Investigate, through making and responding, the art practice of one previously studied contemporary artist through the concept of 'Art as lens', and two other relevant artists to answer the following question: How do artists use objects as symbols to express personal viewpoints through their artworks?	Supporting resource: Reverse chronology (PDF) (PPTX) **Exemplar investigation and presentation** • Joachim Froese, *Rhopography*, 1999–2003 https://www.joachimfroese.com/rhopography.html • Cornelia Hesse-Honegger (studies of insects commenting on hazards of nuclear power) https://www.interaliamag.org/articles/cornelia-hesse-honegger-lying-on-a-daily-basis/

Time	Subject matter	Learning experiences	Resources
	• implement investigation of diverse art practices through teacher-facilitated inquiry questions. **Researching** Students: • research visual communication of diverse art-making lenses or viewpoints as they react to stimulus • analyse and compare past and present artworks through the contemporary context to interpret 21st century art ideas and issues, and how these challenge engagement, communication and meaning; through – making, students can test boundaries of traditional art practices; they reconceptualise, modify and explore appropriation of artworks and images; and investigate the impact and place of new technologies on art practices and experiences – responding, students examine new or different meaning and significance that may be assigned to artworks of the past; and question and re-evaluate traditionally held values and assumptions of art and representation • analyse and compare artworks through the personal context to interpret emotions, sensory experiences, personal philosophy, beliefs and ideas, and how these contribute to engagement, communication and meaning through – making, students investigate their responses to the world around them, their personal interests, experiences and philosophies, and the impact these have on symbolism and practices – responding, students examine new or different meaning and significance that may be assigned to artworks of the past; and question and re-evaluate traditionally held values and assumptions of art and representation • analyse and interpret artworks in teacher-directed, reverse chronology case studies to investigate and compare historical influences on contemporary artists and approaches • experiment with a range of lenses in visual responses that represent the material world. **Reflecting** Students: • evaluate – how artists assign and represent symbolic value on various people, places and/or objects through traditional and non-traditional approaches in artworks – visual language, processes and intentions in artworks that purposely distort representations to emphasise and communicate the artists' viewpoint • justify – individual art practice by documenting process to make meaningful connections and inform progress	• Teacher models investigation and presentation structure to demonstrate requirements for assessment. • Responding: – students ▪ establish inquiry question for investigation from assessment task ▪ navigate art texts, three-level guide comprehension activity; compare different text styles, e.g. curatorial essays and exhibition catalogues, chronological texts, artists' websites; understanding terminology and annotations, e.g. movements, media ▪ identify credible internet resources for research ▪ use graphic organisers for research notes ▪ learn how to locate and document information about artists' influences. • Making: – students ▪ understand inspiration versus appropriation in experimental work ▪ explore and investigate ideas, media and approaches generated from research; receive teacher guidance with increasing independence. • Responding: – students ▪ select appropriate artists to respond to inquiry question ▪ use PEEL paragraph structure for analysis and interpretation ▪ use reference lists and citations, with use of electronic reference tools. • Making: – students ▪ use photographic techniques for documenting and presenting experimental work in digital presentations. • Responding: – students ▪ conduct individual research through contemporary and personal contexts ▪ develop effective presentation techniques ▪ prepare for presentations. • Making: – students ▪ conduct individual experimentation ▪ analyse experimental work to select as support for presentation. • Responding: – students ▪ make presentations to class, with peer feedback received.	• Juan Sánchez Cotán, Dutch still-life painter https://www.youtube.com/watch?v=-ZsAwhgM1wc In addition to the terminology listed in Unit 1, there are many reference sources available that provide definitions, overviews and brief explanations of art materials, techniques, movements, topics, genres and themes.

Time	Subject matter	Learning experiences	Resources
	– how artists apply lenses to represent and communicate personal values and viewpoints in artworks. **Resolving** Students: • resolve ideas as they respond in visual, written or spoken forms • apply – literacy knowledge and skills to understand form and structure of extended paragraphs and written or spoken report responses – language conventions to construct written responses about meaning and expression in artworks and inspirational art practices that meet specified conditions – referencing conventions to acknowledge sourced information about relevant artists and their practices when researching – critical literacies across visual, aural, kinaesthetic, spatial and multimodal devices to assist learning when interpreting and making meaning • realise – ideas in making and responding tasks through the personal and contemporary contexts to communicate innovative representations of the material world – information and ideas to communicate multiple perspectives by combining and layering various art materials, techniques, technologies and processes.		
4 hours	**Resolving** Students: • realise – ideas in making and responding tasks through the personal and contemporary contexts to communicate innovative representations of the material world – information and ideas to communicate multiple perspectives by combining and layering various art materials, techniques, technologies and processes.	**Formative assessment: Experimental folio** • Responding: – students ▪ write a reflective statement to support selection of work and processes in experimental folio. • Making: – students ▪ continue independent work with selected experimental work ▪ consider how investigation experiments could be incorporated into further experiments ▪ select artworks for inclusion in students' assessment folios or display for presentation.	Supporting resource: Reflection (PDF) (PPTX) Supporting resource: Reflection transcript of video • Template for presentation of work • Space and equipment for display • Cameras to document artworks
